Nu Guard

Beautifies and Protects

- Protective Coating
- Ready To Use
- Restores New Look

CAUTION:
KEEP OUT OF REACH OF CHILDREN. Do not take internally.
Protect product from freezing temperatures.
See side panel for additional precautionary information.

Protective Coating

For Vinyl, Rubber & Other Automotive Surfaces

DESCRIPTION

A unique blend of polymers which seal, protect and beautify surfaces and finishes. NU GUARD provides a protective layer which restores luster, deepens color and leaves a deep gloss to the finishes. Protects against static bonding of dirt particles to the surfaces. NU GUARD seals out moisture, ozone, ultraviolet rays and oxidation which can cause dulling.

DIRECTIONS

Prior to application, surface should be cleaned. Product should not be applied over, grease, oil, dirt, dust or other soils. Product is applied undiluted, as received in original container. Using sprayer, sponge or cloth, apply to surface and allow to penetrate for 2 or 3 minutes. Using a clean, dry, lint-free cloth, wipe away excess and buff surface to gloss. Repeat application periodically to extend protection and beauty. For best results, the initial application should consist of two coats of product. Note: Do not use on floors or fabrics. Do not get on the tread surface of tires.

ADVANTAGES

- Ready to Use – No dilutions necessary
- Preserves surfaces by sealing out moisture
- Protects surfaces from UV rays, ozone & oxidation
- Beautifies & restores luster to dull surfaces
- Non-hazardous

RECOMMENDED APPLICATIONS

Vinyl	Plastic	Rubber
Leatherette	Painted Wood	Metals
Luggage	Jackets	Book Bindings
Dashboards	Seats	Handbags & Purses
Tires	Rims	Bumpers
Floor Mats		

TYPICAL PRODUCT SPECIFICATIONS

Appearance	Milky white liquid
Scent	None
pH	7.0
Weight, per U.S. gallon	8.3 lbs.
Specific gravity	1.0
Viscosity	Thin
Foam	Very low
Flashpoint	None
Emulsification	Excellent
Stability	Excellent
Solubility	Complete
DOT shipping	Non-hazardous
