

Prevents Flat Tires

Guaranteed for the Life of the Tire[®]

PneumaSeal[™] Automotive

FOR USE IN:

Automobiles
Minivans
Pickup Trucks
Sports Utility Vehicles
Vans
4x4 Vehicles

DESCRIPTION:

PneumaSeal Automotive was scientifically developed to eliminate flat tires in high speed automotive applications. Patented tire sealant technology enables PneumaSeal Automotive to quickly and effectively seal tread area punctures up to ¼ inch in diameter. PneumaSeal Automotive also seals and prevents air loss from bead leaks, rim leaks and tire porosity. The unique thixotropic formula of PneumaSeal enables it to maintain an even layer of sealant around the inner liner of the tire, which allows for immediate sealing of any tread area puncture. PneumaSeal Automotive has been thoroughly tested by Smithers Scientific Services, a well respected independent tire testing laboratory, and has been approved by the U.S. Postal Service for use in all postal vehicles.

FEATURES AND BENEFITS:

- Specially formulated to prevents flat tires automobiles.
- Reduces fuel costs by maintaining the recommended tire pressure.
- Prevents underinflation due to slow leaks or punctures.
- Continuously coats interior casing to fill cracks.
- Reduces internal dry rot and deterioration by keeping tire casing moist and pliable.
- Protects against rust and corrosion.
- Maximizes and extends tire life by more than 20% by maintaining proper tire inflation and pulling excess heat away from the tread area.
- Seals rim weld imperfections.
- Reduces the risk of tire blowouts.
- Ready to use – requires no mixing, stirring, shaking or other special preparation.
- Provides peace of mind and safety on the road.

TYPICAL PRODUCT SPECIFICATIONS:

Color	Light Blue
Odor	Slight solvent
Weight, per U.S. gallon	8.50
Storage	2 years min.
Flash Point	Non-flammable
DOT Shipping	Non-hazardous
