

1 STEP

A One Step Cleaner & Polish

PIF# 629

DESCRIPTION

1 STEP is an easy to use automotive product that cleans, seals and protects in a single step, without the use of water. Product is ideal for cleaning any vehicle surface, including painted outer-bodies, glass, chrome, rubber, vinyl, plastic and fiberglass. 1 STEP contains a unique polymer wax system that temporarily bonds to the automotive finish and provides long-lasting protection. 1 STEP's polymer wax system leaves behind a high gloss finish that retards the re-soiling of vehicle finishes.

DIRECTIONS

Use only soft, clean, dry cloths. Spread a thin film over the area to be cleaned and polished; do not over use. May be removed at once or after drying for several minutes when a slight whitish haze will appear. To remove, use soft, dry absorbent cloths. Turn cloth often so that the buffing will be accomplished with soft clean surface at all times.

APPLICATIONS

Automotive Dealerships	Car & Truck Washes	Fleet Maintenance Facilities
Motorcycle Dealers	Service Stations	Fire Stations & Police Stations
Vehicle Rental	Leasing Companies	Automotive Detail Shops

ADVANTAGES

- No water rinsing necessary
- Effortlessly removes dirt, soils and road films from any automotive surface
